## BERKELEY 70 GPM Series <br> 4" Submersible Pumps

Precision engineered, quality built, and rugged 70 GPM Series submersibles may be used in wells 4 " or larger. Maximum outside diameter 3-7/8".

## APPLICATIONS

- Water systems... for residential, industrial, commercial, multiple housing and farm use.

## SPECIFICATIONS

Discharge - Cast iron, ASTM A48
Class 30
Pump Bowls - Cast iron, ASTM A48 Class 30
Impellers - Polycarbonate with brass insert
Collets - Stainless steel, AISI 416
Upthrust Bearing - Bronze, ASTM B255 Type II
Pump Shaft - Stainless steel, AISI 416
Bowl and Intake Bearings - Nitrile (proprietary spec.)
Lead Guard - Stainless steel, AISI 430
Intake Bracket - Cast iron, ASTM A48 Class 30
Screen - Stainless steel, AISI 430
Pump/Motor Coupling - Stainless
steel, AISI 416

## FEATURES

Discharge - Heavy-duty cast iron construction provides smooth water passage to column pipe. NPT threads standard.
Bowl and Intake Bearings - Fluted, cutless rubber type assures superior abrasive-handling characteristics, located at each stage.
Polycarbonate Impellers -
Glass-reinforced polycarbonate resists abrasives and provides smooth water passages for minimum friction loss. Ensures optimum pump efficiency.
Pump Bowls - Highly efficient hydraulic design... threaded bowl design in gray cast iron.
Upthrust Bearing - Bronze upthrust bearing provides positive momentary upthrust protection during start-up.
Intake Bracket - Efficient hydraulic design minimizes entrance losses, ensuring maximum pump performance.

## Stainless Steel Pump Shaft -

Precision straightened shaft is corrosion-resistant stainless steel.
Pump/Motor Coupling - Stainless
steel for maximum corrosion resistance... precision machined to ensure accurate alignment and power transfer.
Intake Screen - Stainless steel material offers maximum corrosion resistance... protects against damaging solids entering the pump assembly.

*Length and Weight are approximate.
NOTE: Pump end and motor purchased separately.

## OUTLINE DIMENSIONS

 PUMP PERFORMANCE-70 GPM

For lengths, refer to Ordering Information tables.

Dimensions (in inches) are for estimating purposes only.

Tested and rated in accordance with Water Systems Council Standards.
NOTE: Pumps installed with a PRO-Source ${ }^{\circledR}$ tank require a 100 PSI relief valve. Pumps installed with a conventional tank require a 75 PSI relief valve. Relief valve must be capable of relieving entire flow of pump at relief pressure.

CAUTION: DO NOT use pump at flow rates indicated by the symbol ' - '.
To do so can cause premature failure of unit. Pump warranty void when failure occurs under these conditions.
Tested and rated in accordance with Water Systems Council Standards.
NOTE: Pumps installed with a PRO-Source ${ }^{\circledR}$ tank require a 100 PSI relief valve. Pumps installed with a conventional tank require a 75 PSI relief valve. Relief valve must be capable of relieving entire flow of pump at relief pressure.
